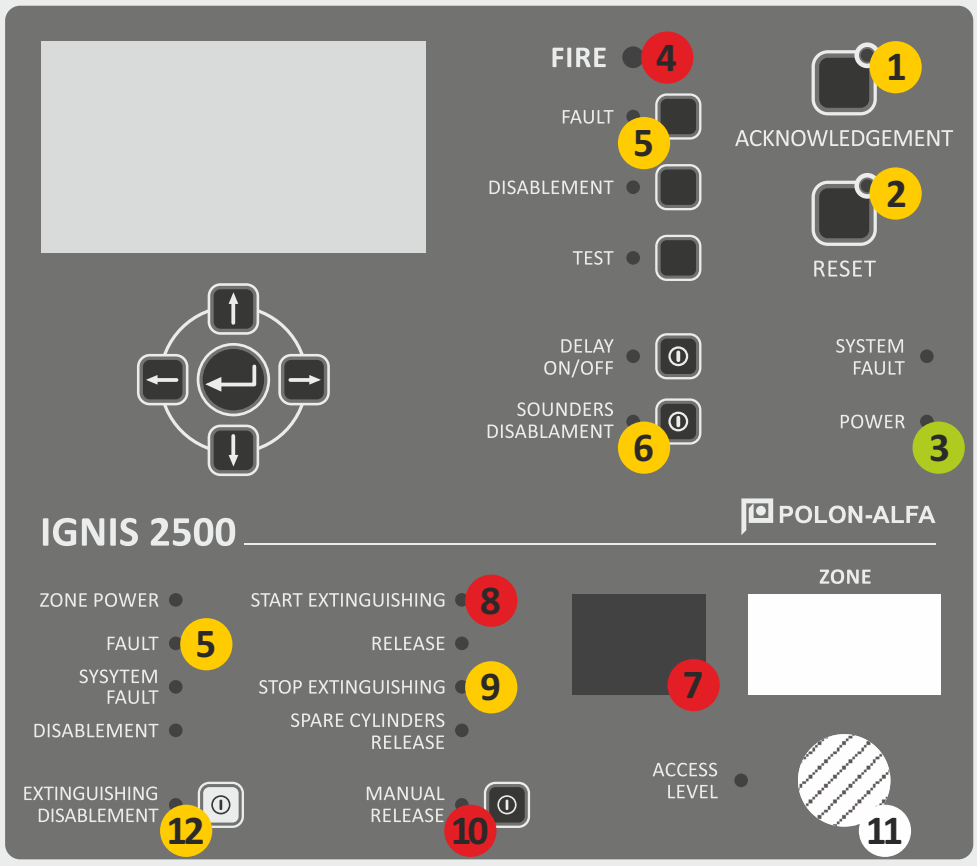
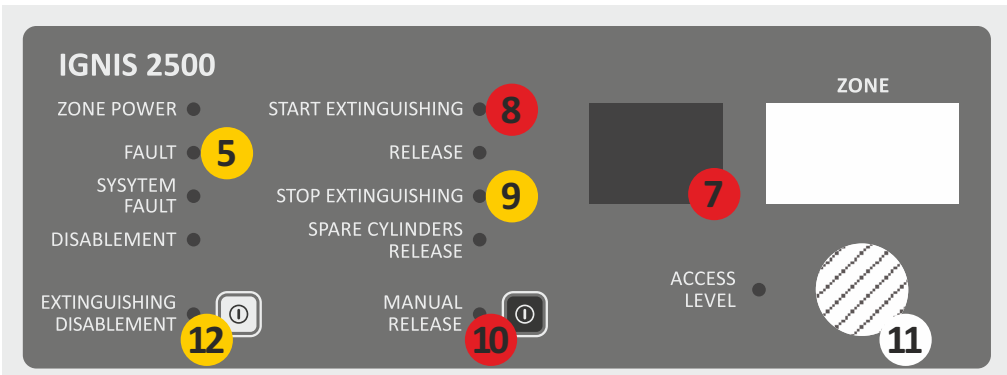
INSTRUCTIONS

HOW TO RESPOND TO IGNIS 2500 CONTROL PANEL SIGNALS





A	**POWER** Indicator 3 is lit – device is operational and ready to detect fire.
B	Indicator 5 - shows **FAULT STATE** (general or reported by any panel's component). **ACTIONS:** ▪ confirm the status with **ACKNOWLEDGE** 1 keypad button, buzzer will be silenced; ▪ notify the maintenance Staff/Company. If the **POWER** indicator 3 blinks – there is no mains or battery power.
C	**FIRE** Indicator 4 blinks and the **START EXTINGUISHING** 8 indicator blinks – this is **FIRE ALARM** state. **ACTIONS:** ▪ confirm the alarm state with **ACKNOWLEDGE** 1 ; buzzer will be silenced, **FIRE** indicator 4 will be solid lit; ▪ make a recon for reported alarm location; ▪ when ensured the real fire state and the personnel has left the extinguished room – activate the **START EXTINGUISHING** call point, which is located next to the room entrance; ▪ for false alarm – return to panel and reset the alarm according to appendix **G** steps – panel will go back to standby mode.
D	**START EXTINGUISHING** 8 is solid lit on one of the zone indication modules – this is **PREPARATION FOR AUTOMATIC EXTINGUISHING PROCEDURE**, the numeric display 7 counts down the delay timer for extinguishing devices activation **ACTIONS** (case depending): ▪ allow the automatic extinguishing procedure to proceed; ▪ temporarily hold the extinguishing procedure by pressing and holding the **STOP EXTINGUISHING** button installed inside the room – the indicator 9 will be lit while on hold; ▪ to permanently disable the extinguishing by pressing the **DISABLE EXTINGUISHING** 12 button on panel's keypad after the switch to Access Level II by rotating the key (11) - **MANUAL OPERATION** indicator will be lit.
E	Indicator 6 is solid lit – the alarm devices are active and **FIRE BRIGADE** notification/routing is active. When the fire will be active **ACTIONS:** ▪ notify FIRE BRIGADE about the false alarm; ▪ reset the alarm according to appendix **G** steps.
F	Manual Operation ▪ to disable automatic extinguishing activation made by detectors – it required to turn key (11) to horizontal position and press 10 button – **MANUAL OPERATION** indicator will be lit. Returning to automatic operation is possible by pressing the **MANUAL OPERATION** again.
G	RESET ALARM – rotate (11) key to horizontal position and press **RESET** button 2 .
